AR Power Case Study

CDM/Projects

What our client said:

“Having worked with Pentagon Assurance number of contracts previously, we were confident that with their support, our team would complete this project, on time, in full and in a safe and fully compliant manner. The experience of Pentagon Assurance was invaluable in ensuring safe delivery of this 1.3MW rooftop solar panel system.”

Chris Balmer, Operations Director

AR Power

AR Power is an MCS accredited renewable energy company with an ethical and personal approach to delivering fit for purpose solar solutions to clients across the UK.

Sector

Renewables & Environment

North East

CDM Project

In September 2022, Pentagon Assurance was appointed Principal Contractor & Principal Designer on a HSE notifiable CDM project for client BHK(UK) on a 1.3MW solar PV installation in Peterlee. including the delivery of pre construction information, F10 Notification of Construction Project to HSE, on site support throughout the delivery of construction phase plans, commissioning and completion of the Health and Safety File in February 2023, the team were on hand to ensure that the project was fully compliant while considering the health and safety risks to everyone affected by the work. The project finished with 4,000 hours worked, zero accidents and all lead indicators delivered.
