

Incentivesmart Case Study

ISO Systems

What our client said:

“Achieving ISO 27001:2022 re-certification is another significant landmark for Incentivesmart. It is a testament to our commitment to protecting our customers’ data and to providing them with the highest level of security. The support from Pentagon Assurance was invaluable in achieving this, alongside ISO 9001 recertification.”

ISO Systems

Alongside achieving ISO 9001 recertification, Incentivesmart have also successfully achieved re-certification of ISO 27001, the international standard that helps an organisation manage information security risks.

Maintaining high standards is crucial for a data-driven business like Incentivesmart. By adhering to ISO 27001, they demonstrate to their customers and stakeholders that they have implemented an ISMS in accordance with international best practices, protecting the confidentiality, integrity, and availability of its customers’ data.

Throughout the implementation process, Incentivesmart received valuable support from Pentagon Assurance. They played a vital role in the systemisation of the ISMS to build a comprehensive framework of controls covering all aspects of information security, from risk assessment and management to incident response and recovery.
